

Dear Sirs,

I write to inform you that I'm a regular listener and contributor to K-LOVE in my community of Phoenix. The positive music and format of this programming is a welcome relief for myself as a father when deciding which station to listen to in the car with my young sons. The upbeat music is not found anywhere else in Phoenix and is welcome alternative from much of the other music and programming found in our community. If K-Love were to disappear due to your proposed LPFM service having a greater priority over FM translators it will have a negative impact on our community. Frankly, having K-love on the radio during my morning and afternoon commutes is a big stress relief due to the traffic congestion that exists in the greater Phoenix area. People need something positive like K-love as an alternative to all of the other commercial programming that exists on the radio today. Frankly, this proposed action by the FCC seems to be yet another example of Washington D.C. bureaucrats doing all that they can possibly do to persecute Christian values in our society. Please, do not remove the capability for K-Love to exist as it does today by your actions.

Sincerely

Mark Swenson
